# SANDY POND

Embden, Somerset County  
U.S.G.S. Embden, Maine (7½')

## Fishes

Brown trout  
Smallmouth bass  
White perch  
Yellow perch  
Chain pickerel

Minnows  
Golden shiner  
White sucker  
Hornpout (bullhead)  
Redbreast sunfish  
Pumpkinseed sunfish  
American eel

## Physical Characteristics

Area - 107 acres

Maximum depth - 41 feet

Temperatures:

Surface - 77°F

40 feet - 48°F

Principal fisheries: Brown trout, smallmouth bass, chain pickerel

Sandy Pond is located south of Embden Pond. Its swampy inlet flows in from the north and its short, shallow outlet flows east into Fahi Pond. The pond's shoreline is lightly developed.

Water quality in Sandy Pond is marginal for coldwater gamefish. Water below 15 feet is oxygen deficient and upper levels reach critical temperatures in the summer months. Brown trout are stocked to provide a coldwater fishery. Bass and pickerel in the pond grow to sizes attractive to anglers.

Sandy Pond is accessible by canoe via the outlet from the Fahi Pond Road. The pond is open under general law in both the summer and winter fishing seasons. See the lawbook for additional regulations.

Surveyed - July, 1940

Resurveyed - June, 2001
